

## **Lenkeson Global Christian University Healthcare Administration Program**

The BACHELOR'S degree in Healthcare Administration from LENKESON GLOBAL CHRISTIAN UNIVERSITY prepares students to be leaders in a range of healthcare settings and is grounded in real-world application.

The program is taught by professors who are also practicing healthcare professionals, and it encourages you to discuss best practices and various viewpoints with your students, all of whom work in healthcare. Learners will acquire the necessary skills and training to meet the needs of this profession from critical thinking to collaboration, policy and process development, organizational effectiveness, continuous improvement, and leadership, among others.

Transfer up to 30 credits toward a bachelor's degree to accelerate your completion.

Depending on your area of concentration, this degree may involve face to face coursework and internship:

- Informatics in Health Care
- Leadership in Health Care
- Health Care Operations
- Health Care Policy
- Health Care Administration

Healthcare is without a doubt one of the fastest expanding industries in the United States and around the world. Rapid demographic shifts, technological advancements, and developments in medical research have raised the need for more educated, devoted, and caring individuals to join this area.

The Bureau of Labor Statistics projects that between 2018 and 2028, employment growth for medical and health services managers will be much quicker than average. You will be able to do the following functions:

- Evaluate risk management and quality control techniques in order to aid in the improvement of patient outcomes.
- Address the issues and possibilities confronting administrators of health care services.
- Effective communication in a variety of healthcare settings
- Improve the overall performance of the healthcare system by using data and technology.
- Utilize management and leadership abilities that are pertinent to the evolving healthcare business.

Your studies at LGCU will examine several dimensions of the constantly increasing healthcare business and the social, political, ethical, legal, and economic forces that create domestic and global complicated healthcare system. With a bachelor's degree in health care administration, you will be prepared for a variety of health-related careers, including medical administration, hospital operations, health care human resources, health care strategy, health service management, facilities management, medical information management, clinical research management, clinic administration, health information management, or health care office staff. Additionally, the online curriculum prepares you to pursue a Master of Arts in Health Care Administration degree at Lenkeson Global Christian University (LGCU).
